

My major

Currently I'm going for a bachelor's degree in finance and a minor in economics. My plan after college is to become a Financial Advisor for Edward Jones. I chose this as my career because most people in the U.S. are greatly struggling with finances, so to me this is the way I can help people best.

Technical background

My technical background is rather sparse. Mainly with computers I consider myself "technically illiterate" due to my lack of experience. While I am a published game developer, my computer skills are strictly within those programs that I use.

About me

I am a 20-year-old from Spring Creek Nevada. I have lived there for most of my life so being in a city is quite the change of pace. Some of my hobbies include working out, hiking, fishing, game development, rock climbing and working on vehicles. My current project is working on a 1936 ford pickup that I'm going to rat rod. The reason I chose UNR was simply because it was the cheapest and most convenient option to me.

Joseph Terras

What's important to me.

The photo on the right is of my 3 cats. The 2 on the left are both 3-year-old Maine Coons and the one on the right is a stray we rescued from Winnemucca about 10 years ago when she was just a kitten. From left to right their names are Luna, Tiggy, and Mittens.
